Overview

Portable and efficient air purification designed specifically for vehicle interiors.

Compact Car Air Purification

This USB-powered car air purifier is a compact and efficient device engineered to enhance air quality within your vehicle. By utilizing a high-efficiency HEPA and activated carbon filtration system, it effectively captures airborne particles like dust, pollen, and mold spores while neutralizing odors and harmful gases. Its sleek, portable design ensures it fits seamlessly into any vehicle interior, providing a healthier and more comfortable driving environment.

Technical Specifications

Product Dimensions	74 x 74 x 170 mm
Net Weight	250 g
Power Requirements	DC 10-15V, 300-500mA
Power Consumption	8 W

Performance

Key Performance Metrics

8 m³/h

CADR

50 million/cm³

Negative Ion Output

99 %

PM2.5 Removal Rate

Noise Level

d 35dB

Filtration System

Removal Capabilities

- Dust
- Pollen
- Mold Spores
- Formaldehyde
- Exhaust Fumes
- VOCs

Filter Technology

HEPA, Activated Carbon, Negative Ion

Design & Features

The air purifier showcased in a professional setting, highlighting its market presence.

Key Features

Portable • 360 Degree Filtration • Quiet Operation • USB Powered

Chassis Material

ABS Plastic
