

USB Powered Mini Computer Speaker

This is a compact, USB-powered speaker for computer use. The speaker features a cylindrical design with a metal grill, connecting via USB for both power and audio.

Product Overview

Compact USB Multimedia Speaker

The TL-M2006 is a sleek, cylindrical speaker engineered for modern workspace efficiency. Designed for simplicity, it utilizes a single USB connection to handle both power and audio input, eliminating unnecessary cable clutter. Its compact form factor is specifically optimized for laptop users and professional environments where desk space is at a premium.
