USB Powered Paper Shredder

This is a compact and portable paper shredder that is powered via USB. It shreds paper into small strips for secure disposal.

Product Overview

Compact Shredding Solution

This portable paper shredder is designed for light-duty document disposal in home or office environments. Powered conveniently via a standard USB connection, it eliminates the need for bulky power cables. The unit features a transparent housing that allows users to easily monitor shred capacity and know when to empty the container.
