

# USB Rechargeable Lithium-Ion Battery

This lithium-ion battery offers the convenience of USB charging with a built-in USB port. It provides a rechargeable power solution for various devices, removing the need for external chargers.

## ADDITIONAL IMAGES

## Product Overview

### Innovative USB-C Rechargeable Power

This high-capacity lithium-ion battery provides a sustainable and convenient power source for a wide array of 1.5V electronic equipment. Featuring an integrated Micro-USB charging interface, it eliminates the need for bulky external battery chargers, offering a streamlined experience for professional and personal use. Its environmentally friendly design is mercury and cadmium-free, making it an ideal choice for modern, eco-conscious operations.

## Performance Metrics

### Core Specifications

**1400 mAh**

Capacity

**1.5 V**

Output Voltage

**3 A**

Max Output Current

**1.5 h**

Charging Time

## Physical Properties

Dimensions

50.2mm x 14mm

## Technical Details

Charging Input

5V / 500mA via MicroUSB

## Compatibility

### Recommended Uses

- Wireless microphones and peripherals
- Digital cameras and flash units
- Medical devices (blood glucose meters, sphygmomanometers)
- Smart home (door locks, inductive trash cans)
- Personal care (electric toothbrushes, shavers)
- Outdoor equipment and flashlights

## Compliance

### Environmental Certifications

Mercury-free, Cadmium-free, Eco-friendly
