

USB to DB25 Data Cable for Scanners

This USB cable connects a computer to a scanner. It provides reliable data transfer and power for seamless scanner operation.

Product Overview

Professional Scanner Connectivity

This high-quality data cable is specifically engineered for U Series Memo scanners, including models U381 and U581. It bridges the gap between your computer's USB interface and the scanner's DB25 connection, ensuring reliable data transfer and steady power delivery. Built with durable materials, it serves as an essential replacement or backup solution for maintaining continuous operational workflow.

Technical Specifications

Supported Models

- U381 Memo Scanner
- U581 Memo Scanner

Connectors	USB Type-A, DB25
Primary Use	Scanner firmware updates and data transfer
