

USB to Parallel Printer Adapter Cable

This adapter cable allows connection of a parallel printer to a computer's USB port. It provides high-speed data transfer and compatibility with most parallel printers, featuring a standard USB Type-A connector and a 36-pin Centronics connector.

Product Overview

Seamless Connectivity for Legacy Hardware

This USB to Parallel Printer Adapter Cable provides a reliable bridge between legacy parallel printers and modern computer systems. By utilizing a standard USB Type-A connection, it eliminates the need for built-in parallel ports, making it an ideal solution for upgrading hardware configurations. Designed for ease of use, the cable supports plug-and-play functionality, ensuring quick and efficient setup without the requirement for external drivers on most operating systems.

Technical Specifications

Performance

1 High-Speed

Data Transfer

Input Connector	USB Type-A
Output Connector	36-pin Centronics
Compatibility	Plug-and-Play, Most Operating Systems, Parallel Printers

Usage Information

Setup Requirements

- Plug-and-play installation
- No external drivers required for most systems
- Ideal for legacy printer integration
