

USB Type-A to Type-C Cable

This USB cable is designed for connecting devices with USB Type-A and USB Type-C ports. It supports both data transfer and charging for devices like smartphones and tablets.

Overview

Reliable Connectivity Solution

This high-quality USB Type-A to Type-C cable is engineered for seamless data transfer and efficient charging. Designed for versatility, it serves as an essential link for connecting modern smartphones, tablets, and various peripherals to computers or power adapters. Its durable construction ensures long-lasting performance and reliable connectivity in demanding professional or personal environments.

Technical Specifications

Core Functions

- Data Transfer
- Device Charging

Compatibility

Smartphones • Tablets • Computer Peripherals

Connector Interface

USB Type-A, USB Type-C
