

# USB Wi-Fi Network Adapter

This compact adapter allows devices to connect to Wi-Fi networks via USB. It features a rectangular design with rounded edges and perforations.

## Product Overview

### Compact Wireless Connectivity

The SWN26DA is a high-performance, low-cost WLAN dongle designed to provide reliable wireless connectivity. Compliant with IEEE 802.11 b/g/n standards, it integrates seamlessly into existing network environments. Its compact, durable design makes it an ideal solution for upgrading desktop or laptop network capabilities via a standard USB interface.

## Technical Specifications

### Device Category

WLAN Dongle • Network Adapter

### Design Details

- Compact form factor
- Rounded edge design
- Integrated ventilation perforations
- Physical control button

### Wireless Standards

802.11b, 802.11g, 802.11n

### Interface

USB 2.0
