

Used CNC Machine Tool

This is a used CNC machine tool with multiple stations. It is designed for high-volume production and precision manufacturing.

Product Overview

Industrial-Grade Multi-Station CNC System

This large-scale CNC machine tool is engineered for high-volume production and precision manufacturing environments. Featuring a multi-station configuration, it supports complex workflows with integrated automated material handling systems. The design facilitates seamless feeding and removal of workpieces, ensuring operational efficiency for heavy-duty industrial applications.

Technical Details

Operational Capabilities

- Automated workpiece feeding
- Automated workpiece removal
- Individual station control panels
- High-volume manufacturing capacity

Key Performance Indicators

1 High

Precision Level

1 Full

Automation

Process Type

Multi-station, CNC, Automated
