

## Used CNC Machine Tool

This is a used CNC machine tool with a robust frame and mechanical components. It is suitable for metalworking applications such as stamping, punching, or forming.

### Product Overview

#### Industrial Used CNC Machine Tool

This industrial-grade CNC machine tool is available for procurement via Tianjin Port. Featuring a robust construction, this unit is well-suited for heavy-duty metalworking applications, including stamping, punching, and metal forming. This machine represents a cost-effective solution for facilities looking to expand their mechanical processing capabilities with reliable, imported second-hand equipment.

### Technical Details

#### Equipment Condition

Second-hand • Used • Imported

#### Mechanical Highlights

- Robust heavy-duty frame
- Large flywheel mechanism
- Vertically oriented ram
- High-force application capability

#### Primary Applications

Stamping, Punching, Metal Forming
