

Used Industrial Piston Air Compressor

This used industrial piston air compressor is built for heavy-duty use. It has a large air tank and safety features.

Overview

Industrial-Grade Performance

This used industrial piston air compressor is engineered for heavy-duty applications, providing reliable compressed air for demanding environments. Built with a robust construction and a large capacity air tank, it ensures extended operation times for consistent workflow. Designed for versatility, the unit includes mobility features such as wheels and a handle, making it an ideal solution for workshops, garages, and various industrial settings.

Technical Specifications

Design Features

- Robust construction
- Large capacity air tank
- Mobility wheels
- Transport handle

Power Source

Electric Motor

Safety Features

Pressure relief valve

Applications

Suitable Environments

Workshops • Garages • Industrial Settings
