

# Utility Cargo Tricycle

This tricycle is designed for utility and transportation purposes. It features a sturdy frame, a cargo bed at the rear, and a step-through design for easy access.

## Overview

### Versatile Cargo Solution

The Utility Cargo Tricycle is an engineered transport solution designed for stability and efficient goods movement. Featuring a robust frame and a spacious rear cargo bed, it provides a reliable platform for short-haul logistics. The step-through geometry ensures easy mounting and dismounting, while the integrated front basket adds supplementary storage capacity for smaller items.
