

Utility Cargo Tricycle with Flatbed

This tricycle is designed for utility purposes, equipped with a flatbed cargo area. It features a step-through frame, front suspension, and a rear cargo bed with railing.

Overview

Heavy-Duty Utility Cargo Tricycle

This utility cargo tricycle is engineered for reliable material transport in demanding environments. Featuring a robust flatbed design with secure metal railing, it provides a stable platform for various logistical tasks. Its step-through frame ensures ease of operation, while the integrated front suspension improves handling and comfort for the operator during daily use.
