

# Utility Cargo Tricycle with Metal Cargo Bed

This tricycle is designed for utility and load-carrying. It features a robust frame, a large cargo bed with metal walls, and a comfortable seat.

## Product Overview

### Rugged Utility Cargo Solution

This utility cargo tricycle is engineered for heavy-duty load transport in various environments. It features a robust frame construction paired with a spacious metal cargo bed, providing a stable platform for goods and materials. Designed for reliability and ease of use, it serves as an efficient solution for internal logistics and material handling.

## Performance

### Performance Metrics

**3 wheels**

Wheel Configuration

## Design & Construction

### Materials

- Robust metal frame
- Reinforced metal cargo bed

### Build Highlights

Heavy-duty frame, Metal cargo bed, Front-wheel steering, Pedal-powered

## Usage

### Recommended Use

Material Handling • Internal Logistics • Goods Transport
