Product Overview

Professional Networking Patch Cords

These high-performance Unshielded Twisted Pair (UTP) patch cords are engineered for reliable data transmission across various network environments. Available in CAT5E, CAT6, and CAT6A standards, they ensure broad compatibility with diverse Ethernet protocols. Constructed with either copper or CCA conductors, these cables are designed for durability and optimal signal integrity in professional and data center applications.

Technical Specifications

Conductor Material

- Copper
- CCA

Wire Gauge

- 24AWG
- 26AWG

Jacket Material

- PVC
- LSZH

Supported Standards

CAT5E, CAT6, CAT6A, EIA/TIA-568B

Performance & Certification

Quality Certifications

RoHS • ISO9001:2000 • ISO14000 • CE • UL

Quality Assurance

1 Passed

Fluke Test

Product Logistics

Packaging Type

- 1PC/PE Bag
- OEM Bag

Available Lengths

0.5M to 50M
