

UTP Cat.6 Keystone Jack for Structured Cabling

This UTP Cat.6 keystone jack is a networking component for terminating Cat.6 cables. It provides reliable data transmission at Gigabit Ethernet speeds.

Product Overview

High-Performance Networking Solution

The UTP Cat.6 Keystone Jack is a high-performance networking component designed for reliable data transmission in structured cabling systems. It supports Gigabit Ethernet speeds and offers universal compatibility with T568A and T568B wiring schemes. Its robust construction ensures long-term connectivity, making it an ideal choice for high-speed network installations in homes, offices, and professional data centers.

Technical Specifications

Category

Cat.6

Wiring Standards

T568A, T568B

Contact Material

Gold-plated contacts

Installation

Compatible Mounting

- Patch panels
- Wall plates
- Surface mount boxes

Installation Method

Snap-in mounting design for easy termination with standard tools
