

UTP CAT6A Ethernet Cable

The UTP CAT6A cable ensures reliable signal transmission with good quality. It is widely used in various market applications for high-performance data networking.

Product Overview

High-Performance Data Connectivity

This UTP CAT6A Ethernet cable is engineered for demanding networking environments, supporting high-speed data transmission up to 10 Gigabit Ethernet. It features a robust design with twisted pair conductors that significantly reduce crosstalk and electromagnetic interference. Ideally suited for enterprise networks and data centers, this cable provides reliable, high-bandwidth performance for critical infrastructure applications.

Technical Specifications

Construction Details

- 4 Twisted Pairs
- Drain wire for grounding
- Blue PVC outer jacket

Cable Type	UTP CAT6A
Max Frequency	500 MHz
Shielding	Unshielded Twisted Pair, Aluminum Foil
Conductor Material	Solid Copper

Performance

Key Capabilities

10 Gbps
Data Rate

500 MHz
