

UTP Unshielded Twisted Pair Cable - 4-Pair Enhanced Category

This UTP unshielded twisted pair cable features a 4-pair configuration for enhanced category performance. The unshielded design provides flexibility and ease of installation for various networking applications.

Product Overview

Enhanced 4-Pair UTP Cable

This Unshielded Twisted Pair (UTP) cable features a robust 4-pair configuration designed for enhanced category performance in high-speed networking environments. Engineered to support both data and voice applications, the cable utilizes eight color-coded conductors twisted to minimize electromagnetic interference and crosstalk. Its flexible, unshielded design facilitates straightforward installation within structured cabling systems, providing a reliable foundation for professional network infrastructure.

Technical Specifications

Cable Type	UTP (Unshielded Twisted Pair)
Conductor Count	8 conductors
Pair Count	4 pairs

Compliance and Usage

Key Features

Enhanced Category • Color-coded • Low Crosstalk • Flexible Design

Primary Applications	Data Networking, Voice Communication, Structured Cabling
