Product Overview

UV-C Water Clarifier System

The UV-C Water Clarifier is a professional-grade solution designed for effective water sterilization and algae control. By utilizing high-intensity ultraviolet light, this system effectively inhibits the growth of harmful bacteria and viruses, ensuring a clean and healthy aquatic environment. The unit features a durable housing and a transparent outlet, allowing for easy monitoring of water flow performance.

Technical Specifications

Power Consumption

11 W

Minimum Power

80 W

Maximum Power

Water Capacity

6000 L

Min Capacity

60000 L

Max Capacity

Flow Rate

1200 L/h

Min Flow

6000 L/h

Max Flow

Maximum Pressure

0.3 bar

Features

Key Features

- Inhibits bacteria and viruses
- Algae control
- Transparent outlet for flow monitoring
- Durable housing construction
- Suitable for aquariums and ponds
