

UV Flatbed Printer for Ceramics and Glass

This UV flatbed printer is designed for high-precision printing on various materials, including ceramics and glass. The lightweight printer delivers exceptional print quality and versatility for personalized markets.

Product Overview

High-Precision UV Flatbed Printing

The GS-1610 UV flatbed printer is engineered for high-precision printing on diverse substrates, including ceramics and glass. Designed for the personalized goods market, it combines a robust, lightweight construction with advanced control systems to ensure consistent, high-quality output. This machine provides an ideal solution for businesses looking to produce intricate, vibrant, and customized designs with professional reliability.

Technical Specifications

Compatible Materials	Ceramics, Glass
Printing Technology	UV Flatbed
Model Number	GS-1610

Performance Features

Key Performance Indicators

1610 mm

Print Bed Width/Length Reference

Operational Advantages

- High-precision printing capability
- User-friendly control interface
- Robust and lightweight construction
- Vibrant color reproduction
