

UV Flatbed Printer for Phone Cases and Cylindrical Objects

This UV flatbed printer is designed for printing on phone cases, acrylic, and cylindrical objects. It offers high precision and stable performance for quality prints with low maintenance costs.

Product Overview

Versatile Precision UV Printing

This compact 9060 UV flatbed printer is engineered for high-precision customization of diverse materials. Designed for professional use, it excels in creating high-quality relief prints on mobile phone cases, acrylic surfaces, and cylindrical objects like bottles. Its stable performance and low-maintenance design make it an ideal solution for businesses seeking reliable production capabilities.
