Product Overview

Professional UV Germicidal Solution

This high-efficiency ultraviolet sterilization lamp is designed to neutralize germs, bacteria, and viruses by destroying DNA and RNA through powerful 253.7nm/184nm UV light. Engineered for sealed environments, the device ensures comprehensive air and surface sanitization. It features a convenient remote control with programmable timers of 30, 60, and 120 minutes for safe and easy operation.

Technical Specifications

Performance Metrics

20 m3

20W Coverage

30 m3

30W Coverage

40 m3

40W Coverage

60 m3

60W Coverage

UV Wavelength

253.7nm / 184nm

Input Voltage

100-240VAC

Design and Materials

Compliance

CE • ROHS • FCC

Construction Materials

Aluminum Alloy, ABS Plastic

Dimensions and Configurations

Model Dimensions

Power	Dimensions (cm)
20W	37.8 x 5.7 x 25.5
30W	48.5 x 5.7 x 25.5
40W	63.5 x 5.7 x 25.5
60W	63.5 x 5.7 x 25.5
