

UV Light Insect Killer

This insect killer effectively eliminates flying insects using UV light. Insects are attracted to the light and then electrocuted by a high-voltage grid.

Product Overview

Effective Insect Control Solution

This UV Light Insect Killer provides a hygienic and efficient method for eliminating flying pests such as mosquitoes, flies, and moths. Utilizing ultraviolet light to attract insects, the device neutralizes them via an internal high-voltage grid. Designed with safety in mind, it features a protective cage to prevent accidental contact and includes a removable tray for convenient maintenance.

Technical Specifications

Target Pests

- Mosquitoes
- Flies
- Moths

Usage Environment	Indoor use (homes, offices, enclosed spaces)
Attraction Technology	Ultraviolet (UV) Light
Safety Features	Protective Cage, Electrified Grid Protection
Maintenance	Yes
