

UV Quartz Sterilizing Lamp with E11 Base

This quartz ultraviolet (UV) sterilizing lamp is designed for disinfection and sterilization. Its clear quartz glass enclosure allows UV-C radiation transmission to kill bacteria, viruses, and other microorganisms.

Product Overview

Professional UV-C Sterilization

This quartz ultraviolet sterilizing lamp is specifically engineered for high-efficiency disinfection applications. Featuring a clear quartz enclosure, it ensures maximum transmission of germicidal UV-C radiation to effectively neutralize bacteria and viruses. With its compact E11 base, the lamp is designed for seamless integration into existing air purification, water treatment, and surface disinfection systems.

Technical Specifications

Base Type	E11
Model ID	GMV3-UV

Key Features

Common Applications	Air Purification, Water Sterilization, Surface Disinfection
---------------------	-------------------------------------------------------------

Performance

Operational Characteristics

- High UV-C intensity for efficient sterilization
- Optimized spectral output for germicidal effectiveness
- Long operational life
- Stable UV output performance
