

UV Sanitizing Vacuum Cleaner

This compact vacuum cleaner uses UV sterilization to kill bacteria. Its powerful suction removes debris from mattresses, upholstery, and other surfaces.

Overview

Professional Hygiene Maintenance

This advanced UV-C sanitizing vacuum cleaner is designed to effectively eliminate 99% of dust mites, bed bugs, and bacteria from soft furnishings. Equipped with a specialized vibration function and powerful suction, it ensures deep-cleaning results on mattresses, sofas, and various fabric surfaces. Its compact, lightweight design coupled with a HEPA filtration system makes it an essential tool for maintaining a sterile and allergen-free indoor environment.

Technical Specifications
