

# UV Sterilization Lamp for Surface and Air Disinfection

This UV sterilization device disinfects surfaces and air using ultraviolet light. It is equipped with a timer and a safety sensor to prevent accidental UV exposure.

## Product Overview

### Professional UV Disinfection Solution

This 38W UV sterilization lamp is engineered for the effective sanitization of both surfaces and indoor air quality. Utilizing high-efficiency ultraviolet technology, the device is designed to eliminate bacteria, viruses, and microorganisms to support a hygienic environment. It features convenient remote control functionality and a robust quartz glass construction for reliable performance in residential, commercial, or clinical settings.

## Technical Specifications

### Rated Power

**38 W**

Power Output

### Voltage Compatibility

110V, 220V

### Material

Quartz Glass

## Physical Dimensions

### Product Size

210 x 110 x 460 mm

## Features

### Control Method

Remote Control • Inline Switch

### Safety Systems

- Timer Function
- Safety Exposure Sensor
