Overview

Advanced Cleaning Solution

This intelligent robot vacuum cleaner offers a comprehensive 3-in-1 cleaning solution, capable of sweeping, vacuuming, and mopping. Designed for modern efficiency, it features an optional UV sterilization function to ensure a hygienic environment by eliminating bacteria. With its smart navigation, obstacle avoidance, and slim profile, this unit effectively cleans under furniture and across various floor types, including wood, tile, and carpet.

Performance Metrics

Engineered for a quiet cleaning experience.

Powerful suction capabilities for thorough cleaning.

Suction Power

1200 Pa
Max Suction

Runtime per Charge 110 min

Climbing Capacity 15 mm

Technical Specifications

Tank Capacities

Component	Capacity
Dust Bin	300mL
Water Tank	180mL

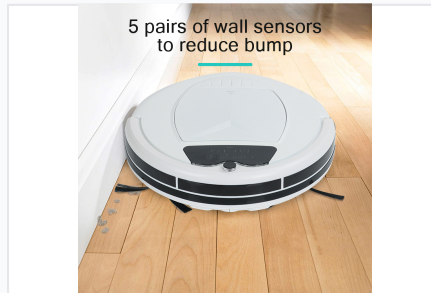

Battery Capacity 2000 mAh

Charging Duration 4-5 hours

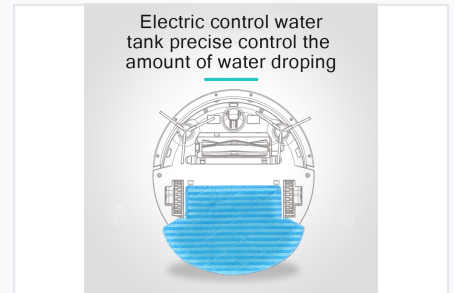

Features & Capabilities

Brushless motor design is ideal for homes with pets, preventing hair entanglement.

Equipped with 5 pairs of wall sensors to minimize bumping and improve navigation.

Electric control water tank allows for precise water dispensing during mopping.

Safety & Navigation

Anti-falling • Anti-collision • Anti-tangling • Obstacle Avoiding

Cleaning Modes Auto, Spot, Edge, Random

Floor Compatibility Wood, Tile, Carpet, Linoleum

Logistics

Container Loading (20'/40'/40'HQ) 1320 / 2640 / 2721 PCS
