

V-Type Regulating Ball Valve

This V-type regulating ball valve offers precise control and reliable shut-off. It is available in sizes ranging from DN15 to DN150 and is designed for pneumatic applications.

Product Overview

Precision Flow Control

The V-Type Regulating Ball Valve is engineered for precise flow control and reliable shut-off in demanding industrial environments. Designed with a specialized V-notch ball structure, it offers excellent regulation characteristics and long-term durability. This series supports a wide range of nominal diameters from DN15 to DN150, making it highly versatile for diverse piping systems operating at a pressure rating of 1.6MPa.

Technical Specifications

Available Sizes (DN)

- 15
- 20
- 25
- 32
- 40
- 50
- 65
- 80
- 100
- 125
- 150

Pressure Rating

1.6 MPa

Key Features

V-Type Design, Regulating, Shut-off, Pneumatic

Dimensional Data

Dimensional Specifications (mm)

DN	A	D	L1	L2	L	F
15	62	464	220	75	365	190
20	62	464	220	75	365	190
25	62	64	220	75	365	190
50	75	100	250	35	410	230
150	160	216	360	165	540	330
