

Vacuum Brazed Diamond Drill Bit

This vacuum brazed drill bit is designed for drilling clean, accurate holes in brittle materials such as ceramic and glass. The vacuum brazing process ensures a strong bond between the diamond grit and the steel body, offering durability and efficient material removal.

Product Overview

High-Performance Drilling Solution

This vacuum brazed diamond drill bit is engineered for clean and accurate hole creation in brittle surfaces such as ceramic, glass, and porcelain. The advanced vacuum brazing process establishes a superior bond between the diamond grit and the steel core, significantly enhancing tool longevity. Designed for efficiency, this bit minimizes the risk of material chipping, making it an ideal choice for both demanding professional construction tasks and high-quality DIY projects.

Technical Specifications

Compatibility

- Standard Drills
- Grinders

Durability Features

Vacuum Brazed Technology • High-Strength Diamond Grit • Chipping Resistance

Suitable Materials

Ceramic, Glass, Porcelain, Tile

Drilling Application

Wet Drilling, Dry Drilling
