

Vacuum Cleaner DC Motor

This DC motor is designed for vacuum cleaner applications. Its robust construction ensures durability and efficient power for optimal cleaning performance.

ADDITIONAL IMAGES

Product Overview

High-Performance DC Motor

This high-performance DC motor is specifically engineered for vacuum cleaner applications, ensuring robust construction and long-lasting durability. It is designed for high-speed operation and efficient power conversion, providing the reliability required for modern small appliances. With a focus on performance and efficiency, this motor is a suitable power solution for various vacuum cleaner models.

Technical Specifications

Design Features

- Cylindrical metal housing
- Integrated commutator
- Brushed assembly
- Standard electrical terminals

Motor Type

Brushed DC Motor

Performance Metrics

Core Operational Metrics

1 High

Operational Efficiency

1 Robust

Durability Rating

Applications

Suitable Applications

Vacuum Cleaners, Small Appliances, DC Powered Equipment
