

Vacuum Cleaner Motor Blower Assembly

This is a high-speed vacuum cleaner motor blower assembly. It is designed for efficient air movement and reliable performance in vacuum cleaner applications.

Product Overview

High-Performance Vacuum Motor Assembly

This high-speed vacuum cleaner motor blower assembly is engineered for efficient air movement and reliable performance in various vacuum applications. Featuring a powerful motor with copper windings and a robust blower fan, it is built for optimal suction power and long-lasting operation. The assembly includes a durable plastic housing, ensuring protection and stability during high-speed use.

Technical Specifications

Key Components

- Motor
- Blower Impeller
- Protective Casing

Motor Construction

Copper Windings, High-Speed, Durable Plastic Housing

Performance Metrics

Performance Highlights

1 High

Airflow Efficiency

1 Optimized

Suction Power
