## Product Overview

### High-Efficiency Vacuum Filtration

These disposable vacuum cleaner filter bags are constructed from durable kraft paper, designed to effectively capture dust, dirt, and debris. Featuring a multi-layered design, they ensure superior particle retention and prevent recirculated air contamination. The reinforced cardboard collar ensures a secure, easy-to-install fit, optimizing both cleaning performance and the longevity of your vacuum equipment.

## Performance Metrics

**Dust Retention Rate**

| 99.97 % | 90 % |
|---|---|
| Maximum Retention | Minimum Retention |

| | |
|---|---|
| **Air Permeability** | 1000 l/m2.s |

## Construction & Design

| | |
|---|---|
| **Material** | Durable Kraft Paper |
| **Key Features** | Disposable, Multi-layered, Reinforced Collar, High Capacity |

## Usage & Installation

**Installation Guide**

- Secure cardboard collar to vacuum intake port
- Follow directional arrows for proper alignment
- Dispose of bag when full using tear-off seal
