

# Vacuum Cleaner Wand Contact Tube

This conductive tube is designed for use in vacuum cleaner wands. It features a cylindrical body with a metallic finish and plastic connectors.

## ADDITIONAL IMAGES

## Product Overview

### Conductive Extension Wand

This conductive extension tube is designed to integrate seamlessly with vacuum cleaner systems, providing extended reach for cleaning tasks. Featuring a durable metallic finish in a distinct red hue, it includes integrated electrical contact points for powered attachments. The unit is equipped with a secure release mechanism, ensuring reliable connectivity and ease of use during operation.

## Physical Characteristics

Color Finish	Metallic Red
Material Composition	Metal, Plastic

## Mechanical Features

### Design Elements

- Cylindrical body
- Gray plastic ends
- Red release button
- Pivoting lever

Release Mechanism	Yes
Connector Type	Electrical Conductive
