Overview

Industrial Vacuum Packaging Solution

This industrial-grade vacuum packaging machine is designed to provide reliable, airtight sealing for a wide range of products. Featuring a robust stainless steel construction and a transparent lid for process monitoring, it ensures durability and ease of operation. The integrated control panel and precision pressure gauge allow operators to maintain consistent packaging standards, making it an essential tool for efficient production environments.

Technical Specifications

Construction Material	Stainless Steel
Lid Design	Transparent

Control & Operation

Operation Type	Industrial Use • Airtight Sealing
Control Interface	Push-button Control, Analog Pressure Gauge
