

Vacuum Power Brake Booster

This power brake booster enhances braking performance in automotive applications. It uses vacuum assistance to reduce the effort needed to apply brakes, providing better stopping power and control.

Overview

Enhanced Braking Performance

This Vacuum Power Brake Booster is engineered to significantly improve stopping power and driver control in automotive applications. By utilizing vacuum assistance, it reduces the physical effort required to apply brakes, ensuring a safer and more responsive driving experience. Constructed with a robust dual diaphragm and precision components, this unit is designed for long-lasting reliability and consistent operation across compatible vehicle models.

Technical Specifications

OE Number

24-3510010-02

Diaphragm Configuration

8 inch

Dual Diaphragm Size

Position/Size

8"x8" Dual Diaphragm

Compatibility

Compatible Vehicle Models

GAZ 24, GAZ 24-10, GAZ 31029, GAZ 3110, GAZ 3302

Construction & Features

Key Features

- Vacuum-assisted assistance for reduced braking effort
- Robust dual diaphragm construction
- Precision-engineered internal components
- Durable materials for extended service life
- Consistent and efficient operation
