

Variable Speed Gearmotor

Variable speed gearmotors provide adjustable speed for a range of applications. Their durable construction ensures long-lasting operation in harsh environments.

Overview

Precision Speed Control Solution

This variable speed gearmotor integrates a high-performance frequency inverter with a robust gearbox and motor assembly. Designed for demanding industrial environments, it offers precise speed control and enhanced energy efficiency. Its compact, durable construction ensures reliable operation in applications such as conveyor systems and packaging machinery.

Performance Metrics

Power Range

0.37 kW

Minimum Power

7.5 kW

Maximum Power

Output Frequency

0 - 200 Hz

Technical Specifications

Ingress Protection Rating

IP54 • IP65

Size Range

0004 - 0075

Main Supply Voltage

3x380 - 440 VAC

Interface & Control

Operation Panel

6-line display with English and Chinese support
