

Variable Speed Impact Drill

This high-performance impact drill is designed for drilling into various materials including wood, metal, and concrete. It features a robust motor for demanding applications and variable speed control for precision.

Overview

High-Performance Impact Drilling

This variable speed impact drill is designed for versatility and power, making it suitable for drilling into wood, metal, and concrete. It features a robust motor built for demanding applications and offers variable speed control to ensure precision across different tasks. The design includes an ergonomic handle for operator comfort and a depth stop for consistent results, making it a reliable tool for professional users.

Technical Specifications

Power Rating

750 W

Power

Voltage	230 V
Frequency	50 Hz
Chuck Capacity	13 mm

Performance

No-load Speed	0-3000 RPM
---------------	------------

Features

Suitable Materials

- Wood
- Metal
- Concrete

Key Features	Variable Speed Control, Depth Stop Included, Ergonomic Handle, Robust Motor
