

Variable Speed Jigsaw

This jigsaw is designed for cutting various materials. It features a powerful motor, adjustable cutting speed, and durable construction.

Overview

Professional Performance Jigsaw

This 710W variable speed jigsaw is engineered for precision and versatility in cutting tasks. Featuring an adjustable aluminium base plate and a 3-position pendulum action, it offers excellent control for both wood and steel materials. Designed with a soft grip and durable aluminium gear box, this tool is built to meet the demands of semi-professional applications.

Performance Metrics
