

# Variable Speed Jigsaw

This jigsaw is designed for cutting various materials with precision. It features a robust motor, variable speed control, and an adjustable base for bevel cuts.

## Overview

### Professional Variable Speed Jigsaw

This high-performance jigsaw is engineered for precision cutting across diverse materials including wood and steel. Featuring a robust 710W motor and a 4-stage pendulum action, it offers exceptional control and efficiency for demanding tasks. The ergonomic design incorporates low-vibration technology and a separated speed regulator, ensuring comfortable handling and accurate results for professional applications.

## Performance

Input Power	710 W
No-load Speed	800-3000/min
Pendulum Settings	4

## Cutting Capacity

### Cutting Capacity

**80 mm**

Wood Capacity

**8 mm**

Steel Capacity

## Electrical

Voltage/Frequency Options	230V/50Hz, 120V/60Hz
---------------------------	----------------------

## Features

### Key Features

- Variable speed control
- Low vibration design
- 4-stage pendulum action
- Separated speed regulator
