

Variable Speed Jigsaw for Wood Metal Plastic

This jigsaw is designed for cutting curves and intricate shapes in various materials. It features variable speed control, an adjustable base for bevel cuts, and a dust extraction port.

Product Overview

Versatile Cutting Performance

This variable speed jigsaw is engineered for precision cutting across a wide range of materials, including wood, metals, non-ferrous metals, and plastics. Its compact, lightweight design ensures comfortable one-handed operation, while the optimized balance mechanism significantly reduces vibration during use. Built for reliability, it features high-performance transmission components and a high-grade motor designed to withstand heavy workloads.

Key Features

Key Advantages

- Compact and lightweight fuselage design
- Optimized balance mechanism for reduced vibration
- Adjustable cutting angle for bevel cuts
- Anti-self-locking switch for safety
- High-temperature enameled wire motor for overload capacity
- Tool-free blade change system

Technical Specifications

Safety Features

Anti-self-locking switch • Dust extraction port

Performance Highlights

1 Hand

Operation Type

Compatible Materials

Wood, Metal, Non-ferrous metals, Plastic, Ceramic tiles
