

Variable Speed Mini Metal Lathe

This variable speed mini metal lathe is a compact machine tool for precision metalworking. It features a robust construction and variable speed motor for controlled turning, facing, threading, and drilling.

Product Overview

Compact Precision Engineering

The CJ0618 Variable Speed Mini Metal Lathe is a professional-grade compact machine tool engineered for precision metalworking in restricted spaces. Its robust construction facilitates high-accuracy turning, facing, threading, and drilling operations for diverse metal materials. Equipped with essential safety systems, it serves as an ideal solution for model engineering, jewelry fabrication, and precision small-scale production.

Specifications

Model Number	CJ0618
Certifications	CE

Safety & Features

Safety Equipment

- Chuck Guard
- Emergency Stop Button

Included Components

- Chuck
- Tool Post
- Tailstock
