

Variable Speed Scroll Saw for Woodworking

This scroll saw is designed for intricate woodworking projects. It features a variable speed motor ranging from 750 to 1500 SPM, a tilting table, and a flexible dust blower.

Product Overview

Professional Precision Cutting

The SS16EW Scroll Saw is a specialized precision tool engineered for intricate woodworking and detailed craftsmanship. Featuring an adjustable variable speed motor, it provides the versatility required for accurate cuts across a variety of material densities. This compact unit combines a tilting table for bevel cuts with a built-in dust management system to ensure optimal visibility and precision during operation.

Performance Specifications

Stroke Rate

750 spm

Minimum Speed

1500 spm

Maximum Speed

Power Consumption

125 W

Electrical Requirements

Voltage/Frequency

230V / 50Hz

Rated Current

0.6 A

Features

Operational Features

- Variable speed control
- Tilting table for bevel cuts
- Integrated flexible dust blower
- Compact precision design

Compliance

CE Compliant
