

Variable Temperature Heat Gun

This professional-grade heat gun is designed for various applications, including paint removal and heat shrinking. It features variable temperature settings for precise control and an ergonomic handle for comfortable use.

Overview

Professional Variable Temperature Heat Gun

This professional-grade heat gun offers versatile performance for a wide range of applications, including paint removal, heat shrinking, and loosening rusted bolts. Featuring dual temperature and airflow settings, it provides the precise control needed for both delicate tasks and heavy-duty work. The ergonomic design ensures comfort during extended use, making it a reliable tool for professional tradespeople and serious DIY enthusiasts alike.

Technical Specifications

Input Power	2000 W
Voltage/Frequency	230V / 50Hz
Cable Length	1.8 m
Cable Material	Rubber

Performance Metrics

Temperature & Airflow Settings

400 °C

Setting I Temperature

250 L/M

Setting I Airflow

600 °C

Setting II Temperature

500 L/M

Setting II Airflow

Accessories & Compliance

Approvals & Certifications

GS • CE • EMC • RoHS

Included Nozzles	4
Plug Type	VDE
