Overview

Professional Hot Air Gun Kit

This variable temperature hot air gun kit is a versatile solution designed for a wide range of professional and DIY tasks. It features two distinct heat settings and a high-performance coil design, allowing for faster material heating compared to standard models. Equipped with integrated over-heat protection and a hanging hook for convenient storage, this tool ensures both safety and ease of use in various workshop environments.

Technical Specifications

Model	PLD2190
Power Consumption	2000 W
Voltage	220-240V
Frequency	50 Hz

Performance Metrics

Heat Settings

450 °C

Setting I Temperature

600 °C

Setting II Temperature

Airflow Capacity

300 L/M

Setting I Airflow

500 L/M

Setting II Airflow

Features

Key Features

- Dual heat settings for versatile operation
- Integrated over-heat protection system
- Built-in hanging hook for easy storage
- Rapid heating coil design

Applications

Ideal Applications

Paint Stripping, Varnish Removal, Decal Removal, Wire Wrap Shrinking, Loosening Fittings, Pipe Thawing
