

Variable Temperature Hot Air Gun

This hot air gun is designed for various applications including paint removal and heat shrinking. It features variable temperature control for precise heat application and overheat protection for enhanced safety.

Product Overview

Professional Variable Temperature Hot Air Gun

This versatile 2000W hot air gun is engineered for professional and DIY applications, including paint removal, heat shrinking, loosening rusted bolts, and thawing pipes. It features precise variable temperature control across three distinct settings to ensure optimal heat application for different materials. With an ergonomic design for reduced fatigue and built-in overheat protection, this tool combines safety, comfort, and durability.

Technical Specifications

Power Rating	2000 W
Voltage / Frequency	220V/50Hz, 110V/60Hz

Performance Metrics

Temperature & Airflow Settings

Setting	Temperature	Airflow
Setting I	60°C	250 L/M
Setting II	400°C	500 L/M
Setting III	600°C	500 L/M

Features

Included Accessories

- 4 pcs nozzles

Safety Features

Overheat Protection
