

Variable Volume Digital Micro Pipette

This variable volume pipette is designed for accurate and repeatable liquid dispensing. It features chemical resistance and can withstand sterilization at 121 degrees Celsius.

Product Overview

Precision Liquid Handling

This variable volume digital micro pipette is a precision instrument designed for accurate and repeatable liquid dispensing in laboratory settings. It features a clear digital display for easy volume setting and confirmation, ensuring high reliability for molecular biology, biochemistry, and clinical chemistry applications. Built with chemical-resistant materials, the device is designed for durability and can withstand sterilization at 121°C.

Key Features

Instrument Capabilities

Chemical Resistant, Sterilizable (121°C), Volume Lock Mechanism, Digital Display

Technical Specifications

Model Performance Data

Model	Volume Range	Accuracy	Repeatability
P2	0.1-2ul	±12.0-1.5%	d6.00-0.70%
P10	1-10ul	±2.5-1.0%	d1.5-0.40%
P20	2-20ul	±2.5-1.0%	d1.50-0.30%
P50	5-50ul	±2.0-1.0%	d1.50-0.25%
P100	10-100ul	±1.8-0.8%	d0.50-0.15%
P200	20-200ul	±1.0-0.8%	d0.50-0.15%
P1000	100-1000ul	±1.5-0.8%	d0.30-0.15%
P5000	1000-5000ul	±1.2-0.6%	d0.30-0.15%
