

Vegetable Dicing and Slicing Machine

This machine is suitable for processing vegetables such as potatoes, onions, ginger, carrots, cabbage, and celery. It can cut them into slices, pieces, dices, and sticks with high efficiency to save labor.

Product Overview

High-Efficiency Vegetable Processing

This versatile vegetable cutting machine is designed for commercial food processing environments, offering reliable slicing, dicing, and shredding capabilities. Featuring an integrated conveyor system, the unit allows for precise control over cutting and belt speeds via independent frequency converters. It is an ideal solution for increasing productivity in restaurants, catering services, and food production facilities.

Technical Specifications

Capacity

300 kg/h
Min Capacity

1000 kg/h
Max Capacity

Power Output 1.3 kw

Voltage 220V

Physical Attributes

Total Weight 140 kg

Machine Dimensions 1160 x 530 x 1000 mm

Performance

Cutting Capabilities

- Slices
- Pieces
- Dices
- Sticks

Cutting Size Range 1-60 mm

Compatible Produce Potatoes, Onions, Ginger, Carrots, Cabbage, Celery, Leek
