

Vehicle Air Purifier and Ionizer

This compact car air purifier and ionizer plugs into a vehicle's 12V accessory socket to eliminate odors and pollutants. It features an ion generator that releases negative ions to neutralize airborne particles, improving air quality.

Product Overview

Clean Air On the Go

This compact vehicle air purifier and ionizer is designed to enhance your driving environment by eliminating odors, allergens, and pollutants. By utilizing an advanced ion generator, it releases negative ions to neutralize airborne particles, ensuring a fresher and healthier cabin atmosphere. Its space-saving design connects directly to your vehicle's 12V accessory socket, making it a convenient solution for allergy sufferers and those seeking improved air quality during their commute.

Technical Specifications

Power Input	12V Accessory Socket
Technology	Ionization, Negative Ion Generation, Air Purification

Features & Benefits

Primary Benefits

- Eliminates unpleasant odors
- Reduces airborne allergens
- Neutralizes pollutants
- Compact, non-obstructive design

Ideal For

Allergy Sufferers • Asthma Relief • Daily Commuters • Passenger Comfort
