

Vehicle Brake Lining

This brake lining is designed for vehicle brake systems. It measures 209mm in outer arc length, 155mm in width, and 18.8mm in thickness, and includes 12 holes.

Product Overview

High-Performance Brake Lining

This heavy-duty brake lining is engineered for demanding vehicle applications, including public transportation fleets. Designed with precision dimensions and a robust 12-hole configuration, it ensures reliable stopping power and durability. The component is optimized for consistent performance under frequent use, making it an ideal maintenance solution for professional transport vehicles.

Physical Dimensions

Outer Arc Length	209 mm
Width	155 mm
Thickness	18.8 mm

Mounting Specifications

Hole Center Distances

- 181.5
- 155
- 119
- 72

Number of Holes	12
Countersink Angle	150 degrees
Countersink Diameter	15 mm
Shaft Diameter	7.5 mm

Logistics

Units per Package	24
Compatibility	Public Transportation, Heavy Duty
