

Vehicle Carrier Ship for Automobile Transport

This vehicle carrier ship is designed for transporting automobiles and other vehicles. It features a blue hull, white superstructure, and multiple decks for vehicle storage.

Product Overview

Professional Vehicle Transport Solution

This specialized vehicle carrier ship is engineered for the efficient global transport of automobiles and heavy machinery. Featuring a robust hull design and multi-level deck architecture, it ensures maximum capacity and cargo safety during oceanic transit. The vessel is fully equipped with advanced navigation systems and high-capacity exhaust management for reliable, long-distance maritime operation.

Operational Metrics

Operational Capabilities

1 Auto Transport

Primary Purpose

1 Deep Sea

Hull Configuration

Construction & Design

Key Vessel Features

- Multi-deck vehicle storage architecture
- Reinforced blue hull construction
- Integrated white superstructure
- Advanced marine navigation suite
- High-performance exhaust stack system

Compliance & Standards

Safety and Regulatory

Marine Safety Compliant, Navigation Standardized, Open Sea Rated
